## Answer the following questions from these definitions of biblical theology:

J.L. Houlden, "Biblical Theology," <u>The Westminster Dictionary of Christian Theology</u>, edited by Alan Richardson and John Bowden (Philadelphia: The Westminster Press, 1983), 69:

"The expression [Biblical Theology] is used in a number of senses, ranging from the very general to the specific. It may describe any theology which seeks to base itself largely or wholly on scripture, whether out of simplicity or because of elaborated doctrinal principles. But in particular, it refers to a movement which was in its heyday in the 1940s and 1950s, though its roots lay further back, and which, while possessing certain common features, was not wholly homogeneous. The reaction to liberal theology, led by Karl Barth in the years immediately following the First World War, was the major impulse behind it."

Rosner, B.S. "Biblical Theology." In the <u>New Dictionary of Biblical Theology: Exploring the Unity & Diversity of</u> <u>Scripture</u>. Edited by T. Desmond Alexander, Brians Rosner, D.A. Carson, and Graeme Goldsworthy, 10: "theological interpretation of Scripture in and for the church. It proceeds with historical and literary sensitivity and seeks to analyze and synthesize the Bible's teaching about God and his relations to the world on its own terms, maintaining sight of the Bible's overarching narrative and Christocentric focus."
